The Institution of Civil Engineers (UK), the owner of the NEC system, has published "June 2017" versions of a full range of contracts and handbooks, all branded as "NEC4". There have been some revisions and additions since then, in 2019, 2020 and 2023.

NEC4 has taken the successful NEC3 contract suite and enhanced it, with some new features and some new forms of contract. All of the changes are a direct result of feedback from industry, to support methods and provide solutions which Clients are demanding. The changes are evolutionary rather than revolutionary.

New additions to the suite of contracts include:

NEC4 Design, Build and Operate Contract  
NEC4 Professional Services Subcontract  
NEC4 Term Services Subcontract  
NEC4 Dispute Resolution Service Contract (which replaces the NEC3 Adjudicator's Contract)  
NEC4 Alliance Contract

Guidance Notes and "How To" handbooks have been replaced with separate books for

Preparing a xxxxx contract and  
Managing a xxxxx contract

Two new handbooks which cover the whole suite of contracts and essential for all NEC users are:

NEC4 Establishing a procurement and contract strategy.  
NEC4 Selecting a Supplier.

*All NEC4 documents are available separately or available as a 2 Box set which includes all the documents.*

**MS Word templates for drafting and administering NEC4 contracts are available from ECS Associates (Pty) Ltd. Templates include Agreements & Contract Data, Pricing Data, Scope of Work, and associated CIDB tender and award documents complying with SANS 10403. Please contact us for a quotation. Thank you**
